Elmer Systems EDWH is the reporting solution to customers that need a deep insight in company key metrics and performance. Elmer Systems Enterprise Datawarehouse (EDWH) delivers a set of user-friendly reporting possibilities not seen in the area before.

EDWH is a separate database carefully developed to suit modern reporting needs. EDWH can be "filled" with data from all areas of Elmer Systems Business Suite from CRM, accounting, supply chain management, products, customers, web shop etc. The solution can also be combined with your other data sources.

With EDWH users can quickly create their own reports.

With this extensible solution you can gain a 360 degrees overview of your company performance and this way get the "One version of the truth".

The EDWH database is a highly secured database only allowing known users to access data. The solution can be combined with most known reporting tools by ODBC.

EDWH is delivered with reporting examples based on Excel Query (with/without pivoting). The solution is also developed to support the market leading enterprise reporting tool, BusinessObjects, which provides an easy administration and user-friendly ways to create reports. Standard Universes and BusinessObjects reports can be ordered separately together with BusinessObjects licenses.

**Report distribution by e-mail:** Elmer Systems have many delivered many solutions where auto created reports are sent by e-mail to external or internal users. The advanced scheduler in Elmer Systems Business Suite can be enhanced to handle all kinds of distribution needs. Feel free to contact us for examples.

The price of EDWH is based on quantity of users and extra modules like web interface etc. The total price is normally 40-70% cheaper than other market leading reporting solutions.

Elmer Systems EDWH can standard handle up to 8 terabytes, but it can be extended later.

EDWH supports data formats like ODBC, XML, flat files, dbf and many other formats.

Best practice reporting business questions. The EDWH-solution can be enhanced to answer best practice business questions. EDWH-administrators will gain access to best practice business questions in e.g.. sales and forecasting, supply chain management, operations intelligence, product performance etc.

Elmer Systems EDWH is a part of Elmer Systems Business Suite, the market leading business solution in many areas. Elmer Systems EDWH can be extended with more modules:

**Elmer Systems CRM** - the market leading CRM-system including accounting, call center, invoicing, campaigns

**Elmer Systems Web Shop** - integrated web shop in your Elmer Systems solution.

**Elmer Systems Mobile** - connect to the office using a high speed 3G mobile phone.
