

WebShop Remote Host
Professional WebShop hosting

Elmer Systems WebShop Remote Host is the solution to professional hosting of Elmer Systems WebShops.

Most other online-stores require expensive and time consuming resources to manage and update products both in the internal economy-system (ERP) **and** on the external WebShop.

Updating information is typically slow and requires many resources. Wrong or slowly updated information also generates unhappy employees and a lower customer satisfaction. Most other online-stores also require expensive integration between more systems (ERP, CRM, SCM, Online Store etc.)

In Elmer Systems all information is updated from the same place. Elmer Systems is the market leading sales system (CRM), and users can easily create quotes, make invoices, letters, mails, campaigns etc. Elmer Systems also embed a very strong and user-friendly product database, where it is easy to create and update new products with pictures, information etc.

WebShop is a part of this product database, and this is the reason, why users quickly can define how the products will be presented on the online-store.

All working processes are optimized, and new products can be generated in a few seconds. Pictures and product information can be inserted automatically so users will save much time.

Elmer Systems WebShop is 100% web compatible. This means that all changes in the product database are updated in that same second on the Web.

Elmer Systems WebShop comes with a cart/shopping cart and support basket, ordering of products, buying confirmation etc.

Know your customer and your partners. In Elmer Systems WebShop users can quickly be activated and users can change user information, password, activation code etc. Elmer Systems WebShop is perfect to support your customers or your suppliers/partners.

CMS - Easy design with WebShop - WebShop can easily be adjusted, so it is optimized to your company graphic standards. WebShop is build like a CMS-system (Content Management System), where administrators quickly can change top-, side- and menu bars as well as logo, pictures and text. It's fun to change links or categories in WebShop. WebShop is delivered with 10 color- and bar-templates so it's easy to start up. It's also possible to create your own menus.

News and front page: In WebShop the content can be updated quickly - pages include front page, news page etc.

Many different areas. Elmer Systems can be used in many areas of business, where a online shop can make it all faster and easier.

More languages: WebShop supports multiple languages at the same time

Multiple currencies: WebShop supports multiple currencies.

CRM: Elmer Systems WebShop is a X-tras (extra module) to Elmer Systems CRM. Every WebShop is shipped together with a complete and user-friendly CRM-system (sales, invoicing, accounting, campaigns, products, supply management)

Remote Host: Elmer Systems WebShop Remote Host is a separate license to host Elmer Systems WebShops for other customers. The Remote Host solutions are normally run from remote facility management companies with a high degree of security, availability etc.

How does it work?: Local users of Elmer Systems just change product information just as usual. They can change product text, prices, pictures etc. in their local Elmer Systems Business Suite solution. The system automatically transfers the changes to the remote host to change the webshop.

The remote WebShop automatically transfers all new web orders and new customers to the local Elmer Systems solution. A big advantage with this solution is that all information is automatically being created inside the local system and users only have to fulfill the orders.

Price: Elmer Systems WebShop Remote Host has a starting license price of EUR 25.600 and gives access to host Elmer Systems WebShops for Elmer Systems customers. The host center decides themselves the price for hosting the WebShop-solutions. The price for hosting will normally be a monthly fee.

Contact: Feel free to apply for a presentation which might be online. Our callcenter supports VOIP/SKYPE. Phone: +45 4369 3169 or mail: kontakt@elmersystems.dk.
